

Week beginning 4/10/2021

Beegu

By Alexis Deacon

Beegu is an exciting book about an alien baby who accidentally lands on planet Earth and gets separated from her parents. She feels lonely and lost and waits for her mother's call from space. Meanwhile she tries to make friends with some people and children on our planet. Unfortunately, adults are not fond of her and they try to keep her away from their children. But children give her hugs and play with her making her feel comfortable. Eventually Beegu gets reunited with her parents. In her journey on planet Earth, Beegu never forgets how the little ones (children) have made her feel so special and important. Whenever she looks from her spaceship, she always remembers her friends from Earth. The pictures in this book are heart touching as they show the emotions of Beegu and what he goes through in his short journey. This story teaches us that we should be always kind and caring towards others.
