

Week beginning 8/11/2021

My book is called 'What were dinosaurs?'

I choose it because I love dinosaurs.

It is a non-fiction book because it has lots of facts.

My favourite part is on this page because it shows fossils and I like fossils even more than dinosaurs.

To get a fossil, first the dinosaur dies, then dirt, then a long, long time and then you have a fossil in the ground.

I give this book 16 stars.
