

St. Joseph's Roman Catholic Primary School

Home Learning information for parents

Class: Mrs Murphy

4/07/2025

Does your child have a favourite book?

If they do, can you send the book in with your child and during the week we will read their special story to the class. Please make sure you have put your child's name on their book.

Mathematics: number towers and number 10

This week we have been using the cubes to make some number towers from 1-10. They had to use the cubes to represent the numbers and then put them in order. Some other children made towers of 10 using just 10 cubes.

Phonics:

This week's sound is:

'y': yellow, yak, yogurt, yoyo...

"And... down a horn, up a horn and under his head".

UW/CL/P: Float and Sink

This week the children looked at a variety of objects that either floated or sank when put in a bowl of water. They took turns to put the objects in the water and then had to tick their tick list if it floated or sank.

Memory game: Red dog Blue dog

This week the children have been learning how to play a memory game. The object of the game is for the first player to fill the board with the correct matching cards. There was great excitement during the game and the children got quiet competitive with each other.

Please return the book bag each Wednesday.
Remember to check Google classroom for updates and work.
